

RECARO Automotive Seating

RECARO Aftermarket RECARO Sportster GT

What's Different:

The newly designed RECARO Sportster GT features fine touch points as well as performance enhancing materials. This performance Aftermarket seat can also be an outstanding solution for many OEM programs.

Why it Matters:

The sleek lightweight shell with its exclusive new victory design fits perfectly into today's top performance automobiles and their smart interiors. This performance aftermarket seat can also be an outstanding solution for OEM programs.

The Details:

- **New North American design:** The Sportster GT features the new RECARO victory performance foam and trim design that includes an integrated headrest as well as belt pass-throughs.
- **Attractive design and unique craftsmanship:** The Sportster GT features the RECARO needle and shows a stitched RECARO brand logo on the headrest. Available in five options: black cloth, three suede options (red, blue and cloud gray) and a premium leather and carbon weave fabric.
- **Exceptional comfort:** the Sportster GT fits to the human body like a second skin, like a glove. The seat offers outstanding comfort as it supports the body well during spirited driving.
- **Outstanding riding performance:** the seat is the main touchpoint between human body and vehicle (HMI). Due to anatomical shaped seat structure and to the low H-point, the road feedback results in outstanding riding performance.
- **Aftermarket and end-consumer knowledge:** with over 111 years of automotive experience and over 50 years of building high-quality, performance seats and racing shells each RECARO product features the core attributes of our DNA built-in: riding performance, craftsmanship, comfort and design.
